

Anggieta Tri Cahyani

[\(+62\) 857-8230-2143](tel:+6285782302143) | anggitaac33@gmail.com | [LinkedIn: in/anggietaatricahyani](https://www.linkedin.com/in/anggietaatricahyani) | [Portfolio: anggietatricahyani.vercel.app](https://anggietatricahyani.vercel.app)

Fresh graduate with hands-on experience in software development, data analysis, and applied AI, gained through corporate internships and research-based projects. Skilled in full-stack web development (Laravel, React/Next.js), machine learning and time-series forecasting, building automation and computer vision systems for real-world business processes. Strong analytical thinker with a proven ability to turn complex datasets into actionable insights through statistical modeling, dashboard reporting, and predictive analytics. A collaborative team player with excellent communication skills, adaptable across cross-functional environments, and highly self-motivated in independently driving projects from concept to deployment.

Experience

AUGUST – DECEMBER 2025

Junior Programmer | BPJS Ketenagakerjaan | Setiabudi, Jakarta

Worked under Deputi Arsitektur dan Pengembangan TI with Squad PTK dan PMK, contributing to AI, automation, and strategic IT projects. Developed and optimized OCR models for document extraction, built face verification systems using DeepFace framework, and created automation workflows using N8N. Contributed to IT Master Plan (ITMP) strategic planning by developing monitoring dashboards with Looker Studio and supporting stakeholder presentations.

FEBRUARY – MAY 2025

Operations Staff | PT Alfatih Pilar Peradaban | Serpong, Banten

Supported service innovation and regulatory compliance initiatives within the Port Services Division. Designed and developed the company's profile website handling both front-end and back-end development using Laravel, contributing to digital transformation of port-related services. Drafted and organized licensing documentation for TERSUS (Terminal Khusus) construction, ensuring accuracy and regulatory compliance.

Skills

Program Language: PHP, Python, SQL.

Web Development: HTML, CSS, JavaScript, Tailwind CSS, Bootstrap.

Framework: DeepFace, Laravel, CodeIgniter 4, React Js, Next Js.

Tools: N8N, Looker Studio, Git, Visual Studio Code, XAMPP, Laragon, Vercel, Excel, CPUE, ArcGIS, QGIS, Google Earth Engine.

Database: MySQL, Sqlite.

Education

SEPTEMBER 2022 - JULY 2026

Bachelor of Science | Marine Information System | Universitas Pendidikan Indonesia

3.90/4.00 GPA

- Study Focus: Information systems and their applications in the maritime field, including data analysis and data visualization.
- Related Courses: Information Systems, Data Mining, Statistics, Software Engineering, Website Programming, Object-Oriented Programming, and Artificial Intelligence

Project

FEBRUARY - JULI 2026

FINAL PROJECT

A Comparison of The State Space Model and XGBoost Approaches for Forecasting Capture Fisheries Production in Muara Angke

- Conducted comprehensive time-series statistic and machine learning modeling using State Space Models and XGBoost to forecast capture fisheries production in Muara Angke Fishing Port. Evaluated and compared model performance metrics to determine the most accurate predictive approach for fisheries resource management.

JUNI - NOVEMBER 2024

RESEARCH WITH LECTURE

Website Pemetaan Zona Potensial Ikan Pelagis Kecil – FishZone Mapper

- Helping to develop the user interface (UI/UX) of an interactive website using HTML and Bootstrap to map small pelagic fishing zones in the waters of Banten Bay.

JANUARI - JUNI 2024

RESEARCH WITH LECTURE

Website Pemetaan Zona Potensial Ikan Pelagis Kecil – FishZone Mapper

- Designing user interface to provide an optimal user experience. Additionally, I developed both backend and frontend functionalities to ensure the websites performance and features operate effectively. Implemented Artificial Intelligence (AI) technologies for image classification, which are used in analyzing coral health and identifying fish species, as part of efforts to promote the KABL awareness group.
